Gypsum	1 ¹ / ₄ " annular drywall	6" o.c.
Lathing	4d common blued	4" o.c.

**NOTE: Usage may vary somewhat due to regional differences and preferences.*

Sizes

Nail sizes start at 2d, which is 1" long. They range up to 60d size, which is 6" in length. The 2d through 10d are in ¹/₄" increments, i.e., 2d is 1" long; 3d is 1 ¹/₄", etc. Nails above 16d increase by ¹/₂" increments.

Surface Finishes

Bright:

After manufacture, nails are tumbled to remove dirt and "chips" and packed uncoated.

Galvanized:

A zinc coating is applied, via either hot-tumbler method or electrolysis, to protect against atmospheric corrosion.

Cement-Coated:

An adhesive is applied via tumbler to provide increased holding power.

Blued:

Nails are sterilized by heating them until an oxidation layer is formed.

Common Nails

All rough and heavy construction, such as wall and roof framing, concrete forms, etc.
